Room for Linguistics

- Ataman et al. (2017) use a new Morfessor model Flatcat (Grönroos et al., 2014) for Turkish.
  - Considerably better than BPE.
- Huck et al. (2017a) examine English→German:
  - Compound, suffix, prefix and BPE splitting, or a cascade.
  - Suffix+BPE or Compound+suffix+BPE best.
- Macháček et al. (2018) for German→Czech:
  - Unsupervised (Morfessor) and supervised (DeriNet).
  - STE worked best.
