SRC-Based Pseudo-Doc-Aware DA

- Score sentences using DA one by one.
- *In the original order* (i.e. not shuffled).
⇒ Mentally manageable.

Problems of the first run at WMT19 (Barrault et al., 2019):

- No way to go back to previous sentences.
- All sentences in a row must come from the same MT system.
- No longer independent probes (violating statistical assumptions).
